BankstonNice variety and selection of tunes, suitable for church services and perfect for someone switching from pot to org and t ready for "prime time pedals" yet!0 of 0 people found the following review helpful. A great collectionBy Kristine CThis collection of organ music is a lovely addition to my church repertoire. I only wish publishers of music books would bind everything on rings.0 of 0 people found the following review helpful. Excellent easy church organ musicBy CustomerThis has been my best purchase in organ books for a while. I suppose it could be done on manuals alone if that is your need but most of the selections have "natural" pedal lines. This is an excellent variety of compositions by a good variety of composers. Many can be learned easily in a week. Some may take a little more time. Some are quite familiar in the repertoire, many are new to me. But they are all usable. The print is good. I plan to

get my money's worth out of this book.
