**Thomas Pavitte : Animal Querkles** before purchasing it in order to gage whether or not it would be worth my time, and all praised Animal Querkles:

0 of 0 people found the following review helpful. Relaxing fun for the OCD mind....By JessicaThis is SO fun. It's the perfect balance between, "Oh my GOSH I'm overwhelmed by all the colors and all the tiny spaces and where do I start and AAAHHHHH" and "Ahh, the soothing relaxation of coloring in a space without another care in the world." You get your chance to pick your own colors at the start, and then you just color in the lines. It's colorful and interesting to look at (otherwise I'd say just go for the connect the dots books) but takes the decision-making out of your typical coloring book experience. I love the fact that the numbers change in gradient - the darkest numbers being the ones associated with the sections that you color the darkest colors over - so they're easy both to cover up AND to tell apart

at a quick glance. Fantastic find.0 of 0 people found the following review helpful. Brilliant.By ScorpicaI can't say enough at how fun these are to do. They are very relaxing and the concept is brilliant. I use them to relax and to help me fall sleep at night. I will be ordering the rest of the set and ordering more as gifts for Christmas0 of 0 people found the following review helpful. For the artist in all of us!By CarrieVery nice play on color-by-numbers books. Love that the artist didn't dictate color. Every page is numbered 1-5, dark to light. You come up with your own color combinations. The book itself is very large, so each page has a lot of space to fill in. Bought this for my 10 year old daughter to work on during our upcoming road trip.

From the creator of the 1000 Dot-to-Dot series comes Querkles Animals, putting an exciting new twist on the classic colour-by-number images that we loved as children. At first, you see nothing but a baffling tangle of circles, but hidden within each puzzle is a furry face waiting to be revealed! Featuring a menagerie of adorable creatures from chomping chimps to louche giraffes, Querkles Animals provides hours of creative colouring fun for artistic minds of all ages. Choose a dramatic colour scheme to make your Querkle truly unique, discover what's hidden in each puzzle, and create a striking animal portrait that you can easily remove and display.

About the AuthorWhen graphic designer Thomas Pavitte found himself between jobs, he started doodling to keep his creative juices flowing, experimenting with the dot-to-dot puzzles he remembered from his childhood. The result was a 6,239-dot reconstruction of the Mona Lisa, which then led to the 1000 Dot-to-Dot Book and its sequels. Constantly exploring new graphic ideas, Thomas lives in Melbourne, Australia, and shares his work at [thomasmakesstuff.com](http://thomasmakesstuff.com).
