**Dany Sautot : Baccarat (Universe of Design)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Baccarat (Universe of Design):

I purchased this book because I wanted an academic reference book on Baccarat and its products for the active collector. Instead I received a commercial very superficial pocket sized sliver of a book with glossy photos of stuff in royal collections. I blame my disappointment on the misleading blurb which (intentionally?) omits crucial information on the contents, etc. 0 of 0 people found the following review helpful. Five Stars By Customer It is perfect 1 of 1 people found the following review helpful. Baccarat By Possum I wanted to learn of the history of Baccarat and see many of their designs that they are famous for. After this book, I now want to read in more depth and see more pictures of articles made by Baccarat.

Since the early nineteenth century, the mention of luxury glass immediately has brought to mind the legendary French House of Baccarat. Where Steuben and Tiffany are quintessentially American, and Waterford is renowned for its rigorous attachment to cut crystal, Baccarat signifies a variety of things to many different people. For the wine connoisseur it is paper-thin glasses shaped especially to enhance the character and bouquet of Bordeaux, Sancerre, champagne, vintage port, or Napoleon brandy; for collectors, it means the most beautiful opaline and millefiori paperweights ever produced; for the fashion plates, it recalls the exquisite bottles of perfume designed for Guerlain, Patou, Schiaparelli, Dior, and Paco Rabanne, among others; and for potentates, popes, heads of state or Maharajas it has always been known as the Crystal of Kings and the King of Crystals. The Baccarat glassworks were established in 1764 by permission of Louis XV in the province of Lorraine at the foot of the Vosges mountain range. The natural surroundings, the plenitude of hard woods to stoke the furnaces, and the region's tradition of glass-making were the determining factors for choosing the little-known village of Baccarat. In 1816 the first furnace was kindled and masterpieces soon flowed from the fiery mixture of water, sand, potash, and lead. Louis XVIII was the first monarch to grant Baccarat his patronage, followed by Charles X, Louis Phillipe, and the Emperor Napolon III and his Empress Eugnie, the trend-setters of the Gilded Age. Sultan Abdul Mecid of Turkey illuminated his newly built Dolmabahce Palace on the Bosphorus with giant Baccarat chandeliers, and orders such as twelve-foot-high candelabras from Tsar Nicholas II were so demanding that soon Baccarat had to set aside a furnace just for his needs. But the most extraordinary commissions came from India; thrones, settees, crystal tombs, and chandeliers so heavy that one brought down with it the roof of the Maharajah of Gwalior's palace. All the magnificence that epitomized French art de vivre is crystallized in this lovely book.

About the Author Dany Sautot worked for the Museum of Decorative Arts in Paris before becoming an independent curator. Director of the Baccarat museums, she is the author of *Baccarat, une histoire* (published by Baccarat in 1993), and has collaborated on the publication of several catalogs including *Tables royales, Versailles, 1994* and *Paris Belle Epoque, Essen, 1995*. She oversees Baccarat exhibitions in France and abroad.
