From Hal Leonard : Bach Cello Suites for Electric Bass before purchasing it in order to gauge whether or not it would be worth my time, and all praised Bach Cello Suites for Electric Bass:

Be ready for Drop-D tuning if your bass can support it. By CBHouse Overall, very good, and I would recommend. However, a few things to know/understand before you buy. 1. Only one of these movements takes standard E-A-D-G tuning. 2. Tune to D-A-D-G. This may be an issue for you if you have a short scale bass. 3. None of these are in their true key-signatures. They have truly been "adapted" to bass. That said, you can't really "play along" since you will be in the wrong key. Again, this is GOOD. But be prepared. This

probably should have been written for a 5-String Bass, but I appreciate the effort to adapt for 4-String. 0 of 0 people found the following review helpful. Wonderful for a lifetime of practice. Rewarding and punnishing. By Kindle CustomerGreat music and nicely arranged.
