This volume contains contributions by nine scholars on two broad themes: the analysis of Johann Sebastian Bach's orchestral works, especially his concertos, and the interpretation and performance of his music in general. The contributors are a diverse group, active in the fields of performance, organology, music theory, and music history. Several work in more than one of these areas, making them particularly well prepared to write on the interdisciplinary themes of the volume.

"As a barometer of current concerns with Bach-scholarship, *Bach Perspectives* is one of the best available."D. J. Burn, *Eighteenth Century Current Bibliography*
