The UndergroundBy Conscious_ConsumerThis is beautifully illustrated, and if you are a Labyrinth fan, this should be part of your collection. It goes over tons of goblins, some you recognize and some you don't, but you will learn so much as you dive into the Underground once more!

In 1986, the magical fantasy movie *Labyrinth* introduced the world to a set of unforgettable goblins from the minds of Jim Henson and Brian Froud. Not only has the film become a classic with a huge cult following, but Brian Froud's long out-of-print book about the malevolent and cantankerous goblins, packed with his brilliant drawings and paintings, has achieved similar cult status. Now Abrams is proudly reissuing *The Goblins of Labyrinth* in a brand-new 20th Anniversary Edition. With even more artwork than the original and a new afterword from Brian Froud, this mesmerizing work, like Froud's *The World of The Dark Crystal*, is a must-have for collectors and Brian Froud fans everywhere.
