**Stewart Ferris : The Little Book of Flirting** before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Little Book of Flirting:

0 of 0 people found the following review helpful. You Lost Me At The Part About Butt ReadingBy GuitarHeroForHireDespite a quick read, I'd say the first 75% of the book feels like it was written for a 12 year old, what with its frequent nods to butt reading and the like (a whole half page devoted to a hypothetical butt reading session).The last quarter of the book finally pulls loosely enlightening information into the fold, making me wonder why the whole book wasn't written this way from the beginning (less obviously bad pickup lines, more confidence boosters).The last page pretty much sums up all the (useful) information in the book, making me wonder why I wasted 30 mins (its a quick read) of my life reading up to this point.Not recommended unless you seriously don't know why you shouldn't ask a woman if she believes in love at first sight, or if you should walk by again.0 of 0 people found the following review helpful. geared toward sex driven menBy DonnaRather cheesy and I have a hard time envisioning

this book will actually help any men. Has nothing to offer for women. I was hoping since it was written by a man there would be some insight on how to catch a guys eye. Quick read, nothing to get excited about.

A guide to flirting in the 21st century, this text provides tips on how to make a good first impression, when physical contact works, what to say and, more importantly, when to leave a person guessing.
