Daniel Berrigan : The Mission: A Film Journal before purchasing it in order to gauge whether or not it would be worth my time, and all praised *The Mission: A Film Journal*:

0 of 2 people found the following review helpful. Importance of "being with"By Margaret ShieldI so enjoyed everyone's re-living the past, acknowledging violations done to a whole people, --then facing up to what needed to be done now (feeding the people in the area and respecting them, appreciating them as a people-and individuals). It was an opportunity to see how the way we have lived the past in our lives, influences the way we live today! The importance of living up to what each of us believes!!!

From *Library Journal*Though activist Berrigan spent four months in South America as religious advisor on this big-budget film about the destruction in the 18th century of Jesuit-established utopias, his remarks offer little coherent commentary on its production. Rather, the experience serves as the basis for intermittent, often vague, and cryptic meditations about matters that worry him, such as the suffering of the Third World and whether any film can ever convey religious thought. Had these substantial concerns been developed in more detail, this journal would have gained an insightful focus instead of remaining the boringly self-indulgent jotting that it is.
