EVER written on harness handicapping ever. if you are a novice, t you will not pick up every nuance the author explains, But, for anyone who has been serious about this game, this is the book that will turn your game around if you have been at about break even or showing a small loss every year. BEGINNERS, buy Trot picks, by Bob Pandolpho, also for sale here at . This book is simply a treasure trove of brilliant tactics on how to really zero in on your strengths and weaknesses!!!!!!!!!!!!!!The author does an outstanding job putting seemingly abstract ideas, into cogent, easy to understand analogies. Buy this book IMMEDIATELY!!!!0 of 0 people found the following review helpful. You can find a track with primarily pace races like he says he will only playBy OleI don't think much of this guy's ideas, but I'm not a winner at the track yet. You can find a track with primarily pace races like he says he will only play, but that will really limit your number of tracks to play. I play win bets, trifectas, exactas, and ten cent or twenty cent superfectas. I'm always looking for the big score. I win some races but lose more. I usually come out a head or become a light loser, but I'm always entertained. Entertainment is a big thing to me --- my head might ache from over thinking my races, but it is fun to me. My best advice is find a guy or gal who has played the harness races for years and offer them money, food, and drink to teach you. It will be worth it for the years of fun it will give you. Maybe pay for modest bets on the races for them, and have them explain what the hell is going on. Their is so much going on, it's unreal, so many variables. So many things on the race form and the charts that the books just don't show you.0 of 0 people found the following review helpful. Don't BotherBy Jack BenAryVery thin, ego driven monograph positioned as a "not for beginners" book. Filled with very basic observations. Finally reaches a series of very common recommendations that are widely understood by most harness racing fans. A waste of time and money for serious players.

Publishers description: The Secrets of Harness Race Profits Revealed! This book represents three decades of handicapping and betting harness races and is a summary of observations that are important to being a winning player. This book summarizes the conclusions on what made the author a winning player. There is no magic formula to become a winning player and the author is the first to say that there is more than one road to profits. This book is the road taken by Doug Masters to becoming a winning player. Becoming a winning player is part art and part skill, so it is impossible to summarize it as a mechanical method; however, Doug attempts to outline his process in the second half of the book. This book may be difficult for beginning harness handicappers to read because it does not explain any basic terminology. There are, however, glossaries of harness racing terms online as well in the racing programs of harness tracks. There are no winning examples in this book. This is a quote from the author in the introduction. You will find no past performances listed in this book; this is intentional. Anyone who has been around harness racing for even a few years has probably read various books and publications offering a handicapping system. All of them will have examples of how a handicapping system or angle picked a winner. Anyone can do this, especially when so many of these authors are working backwards from the winner. To me, it is simply a waste of time. And besides, only a mediocre or inexperienced handicapper is going to believe there is a single path to success in wagering. This book consists of my observations of the sport and how it relates to my own handicapping perspective. If you are looking for a system that represents some sort of absolute truth, youre looking in the wrong place. Topics include: Handicapping Factors, Drivers, Horse Form, Speed, Pace, Class, Post position, Track, Statistics, Betting multiple racetracks.
