David Paul Greene : The Professional Handicapper: Advanced Teachings In The Ways To Properly Forecast College Pro Football before purchasing it in order to gage whether or not it would be worth my time, and all praised The Professional Handicapper: Advanced Teachings In The Ways To Properly Forecast College Pro Football:

0 of 0 people found the following review helpful. Don't waste your time or moneyBy Randy RuegerMade the mistake

of not looking into this concerning the author since I avoid all Tuttle written books and his aliases. Really a terrible book in terms of knowledge and application. I don't understand how people can get away with writing this absolute garbage and profiting from it. 3 of 4 people found the following review helpful. I wish I could give 0 stars. By ryesteve I can't believe I was stupid enough to unwittingly buy a book written under one of Joseph Tuttle's pseudonyms. They're usually easy to spot, but obviously he's doing a much better job of disguising all of the earlier good reviews that were written by himself and accomplices. The only good thing about this book is that it's ridiculously short and printed in a gigantic font. The little actual content consists of a few theories and formulas that range from laughably simplistic or meaningless, to outright mathematically ignorant. And the incessant pimping of a couple of websites gets really tiresome. One can only hope that he is following his own gambling advice. I'd much prefer knowing that the proceeds from this book are in a bookie's pockets, rather than the author's. 12 of 14 people found the following review helpful. I'm dumber after reading this. By Elihu Feustel This book is full of errors showing a complete lack of understanding of sports betting in general. For example, on page 23, the author compares a player's advantage in betting an NFL team at -5.5 when the fair line is -6, and concludes this yields a 1 % advantage. A 6 point-favorite wins by exactly 6 about 4.5%, which translates into a 4.5% advantage over a bet at -6. On page 35, in explaining how the fair odds on a 3-team parlay are calculated, he explains "quite simple. $3 \times 3 = 9 - 1 \dots$ equals 8 to 1 odds. This is so bad, it is laughable that it is published. This mistake is repeated on page 48 "5 team parlays should pay $5 \times 5 = 25 - 1$, or 24:1". Most of the advice in this book is plain awful as well. He recommends hedging often to prevent bad beats. As far as money management, he advocates keeping about half your money at your main book, and suggests Bodoglife. Any decent pro has money spread out between 5-50 books. Bodog deals dual lines, and won't take a large bet from anyone with a brain. No mention is made of either Pinnacle or Matchbook, which are mandatory outs for pros. He also suggests that your average wager size should increase to 10% or more of your bankroll once you have "gotten ahead at least \$4000". Every few pages contains more unsupported conclusions and horrendous advice. Save yourself time and money on this one - there is nothing redeeming in it.

Make sure to check out (<http://thetuttlemathpsm.com/>). davidgreene39@gmail.com is where I can be reached. My next book, "So You Think You Can Gamble, on Sports" (which will be pertaining to the "Big-3" of sports gambling); is now available. These booklets, are just that; in the fact that they will only be between 90 to 115 pages in length, always. Hence the low price, even though there's plenty of wording (12,104 in this booklet), and it certainly packs a punch! Although, this book was written with all football bettor's in mind; its teachings are a bit advanced for the Beginner/Novice. The Avid/Advanced football bettor, will absolutely LOVE IT!! The "systems" discussed in this book are absolutely years ahead of their time!

About the Author Hello, my name (real name) is Joseph J Tuttle. I've always loved the idea of pseudonyms, and I employ them as "odes" to friends relatives. I'm the proud author of 23 horse and/or sports handicapping books. **DISCLAIMER:** I'm NOT a professional writer! I have been a professional handicapper for over 15 years. I would strongly suggest that you utilize the "Look Inside" feature, or view my writing style @ <http://thetuttlemathpsm.com/> that is my official blog site. My teachings work, and I'm only trying to help others learn how to Win!
