From Random House Kids : The Star Wars Storybook before purchasing it in order to gage whether or not it would be worth my time, and all praised The Star Wars Storybook:

I treasured it for years, but somewhere along the road it was lost and I completely forgot about it. Now, 33 years later, I have a child of my own and have been slowly introducing him to Star Wars. He's only 3 1/2 but he loved the first film so I decided to seek out this book again and see if it would interest him. It's perhaps a little over his head, but he's surprisingly interested when I read him a few pages of it at night. It's obviously geared for children a bit older, but he follows the story no problem. At any rate, it's been fun for me to revisit it after all these years. There are even a few treats for Star Wars geeks like me, like the brief conversation (and accompanying photo) between Luke and Biggs on Tatooine. 5 of 5 people found the following review helpful. Great old storybookBy G. BehmPurchasing this storybook for my son brought me back to when I was a child and read this same book. It is full of movie pictures. While not appropriate for small children and those just beginning to read, it can still be read by an adult to a child who's very into Star Wars. One of the best parts of this book is that it includes the entire movie, with the "delete scenes" we all heard about growing up but never saw the movies made it to dvd, such as (SPOILER ALERT!) the Biggs - Luke Tatooine scene, Luke at Toshi Station, Luke and Treadwell watching the Star Destroyer capture Princess Leia, and more. Relive the action and adventure of Star Wars

with your little ones today with this book. 1 of 1 people found the following review helpful. classicBy
Customerretrieved part of my childhood

The intergalactic adventures of Luke Skywalker and the Rebel Alliance as they battle the evil Imperial forces which have overthrown the Old Republic.
