Although there weren't any truly easy ones, there were still a couple of sections that I found not as challenging to work on so I'm skipping them entirely. Was really looking for a book of all Level 5's (as rated in the Washington Post). Still working my way through the different sections and I have high hopes for the 'Brain' and 'IQ' sections. This book beats a lot of them out there that contain easy/medium levels that are just not worth the time if you are really into the Samurai challenge.1 of 1 people found the following review helpful. Djape has a great series.By pennyanticsAddicted to Samurai's! Djape has a great series.
