EasyBy KennaIt was fun and I felt accomplished when I finished it. I only had a hard time solving one puzzle which required knowing about the w-wing strategy.

Endless fun for devoted solvers! At 21 feet, 9 inches long, and with 8,929 empty squares to fill, this huge puzzle adds big excitement to the popular gameand is the perfect challenge for fans who find regular sudoku too easy. Its composed of 167 regular-sized (9x9) puzzles, linked together at 3x3 corners. Each individual sudokus starting numbers are symmetrically placed in the puzzle, and no more than 30 numbers are given. Also, each 9x9 puzzle has a unique solution. And, finally, the difficulty level increases as you progress from left to right, becoming quite formidable by the end.
